

2073 Pluggable Interface Modules

July 25, 2002

RS-422 IN / RS-422 OUT

The IOC207 accepts two RS422 signals and produces two RS422 outputs. Output polarities can be set by jumpers or remotely controlled via a TTL input signal. It also drives the Daisy Chain and Global buses. The IOC207 uses two triax input connectors; two triax output connectors, two BNC control connectors and operates up to 35 Mbps.

The IOC207 requires two of the 14 available slots in the Model 2073 chassis and will illuminate the front panel A LED during an active RS-422 IN A input and illuminate the front panel B LED during an active RS-422 IN B input.

Input:

- A in RS-422 TRIAX
- B in RS-422 TRIAX
- 78 ohm or 124 ohm input termination

Output:

- A out RS-422 TRIAX can output in A in or B in
- B out RS-422 TRIAX can output in A in or B in

Chassis:

- Model 2073-012

Price Class:

- Class II
