

2073 Pluggable Interface Modules

July 25, 2002

ECL IN TRIAX / ECL OUT BNC

The IOC302 PIM accepts two differential ECL signals, and produces two single ended ECL output signals. Output polarities may be inverted independently. The IOC302 uses two triax input connectors, two BNC output connectors and operates up to 35 Mbps.

The IOC302 requires one of the 14 available slots in the Model 2073 chassis and will illuminate the front panel A LED during an active ECL IN A input and illuminate the front panel B LED during an active ECL IN B input.

Input:

- A in ECL TRIAX
- B in ECL TRIAX

Output:

- A out ECL BNC
- B out ECL BNC

Chassis:

- Model 2073-012

Price Class:

- Class I
