

2066 BUF1 BUFFER MODULE

OVERVIEW

The BUF1 module accepts up to three data and clock input pairs. Each of these pairs is retransmitted on two parallel data and clock output pairs. Data inputs one and two are also provided as bipolar outputs.

SPECIFICATIONS

INPUTS

- All signals are single ended
- BNC Connectors
- 50/75 ohm jumper selectable termination
- Data and Clock Inputs: TTL levels
- 3 data/clock pairs

OUTPUTS

- 50/75 ohm drivers
- BNC Connectors
- 2 data/clock output pairs for each data/clock input pair
- Bipolar outputs for data inputs 1 & 2
